INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
Alexandria, VA 22313-1450

Dear Sir:

In compliance with the duty of disclosure under 37 C.F.R. § 1.56, it is respectfully requested that this Information Disclosure Statement be entered and the documents listed below and on the attached Form PTO-1449 be considered by the Examiner and made of record. Copies of the documents required by 37 C.F.R. § 1.98(a)(2) are enclosed for the convenience of the Examiner.

The references now cited are the following:

In accordance with 37 C.F.R. § 1.97(g),(h), this Information Disclosure Statement is not to be construed as a representation that a search has been made and is not to be construed to be an admission that the information cited is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

This Information Disclosure Statement is being filed prior to the receipt of the first Official Action reflecting an examination on the merits and hence is believed to be timely filed in accordance with 37 C.F.R. § 1.97(b). No fees are believed to be due in connection with filing of this Information Disclosure Statement, however, should any fees under 37 C.F.R. §§ 1.16 to 1.21 be deemed necessary for any reason relating to these material, the Commissioner is hereby authorized to deduct said fees from Brinks Hofer Gilson & Lione Deposit Account No. 23-1925. A duplicate copy of this document is enclosed.

Concise Explanation of Non-English Language Art Pursuant to 37 CFR 1.98

Applicant's previous Information Disclosure Statement listed three non-English language publications that did not include translations or a concise explanation of the relevance of the publications. Applicant currently resubmits these documents with the following explanation of relevance. Taiwanese publication number 84110989 and Japanese publication number 11-512809 are corresponding applications to PCT/US/13199, which was cited in the prior Information Disclosure Statement. The abstract for the PCT/US/13199 application states:

An automatic flush handle actuation apparatus includes an enclosure containing a drive mechanism and a self-contained power source for the drive mechanism. The apparatus also includes means for sensing use of the sanitary facility and means for interconnecting the drive mechanism and power source when the means for sensing detects a use of the sanitary facility. An adapter having first and second ends is included rigidly engaging the enclosure. A plunger pin slidably extends through the adapter engaging the drive mechanism within the enclosure at a first end. A threaded nut is provided around the adapter between the enclosure and a hub at an end of the adapter. The threaded nut, end of the adapter and an end of the plunger pin are constructed to work with the flush mechanism in a manner substantially identical to a manually activated flush handle.

Taiwanese Publication No. 84110990 discloses a similar device. However, the device disclosed in Taiwanese Publication No. 84110990 functions by actuating the handle. As a result, the handle does not need to be removed prior to attaching the flushing device.

Applicant respectfully requests that the listed documents be made of record in the present case.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'A. D. Airhart', is written over a horizontal line.

Adam D. Airhart
